DON'T GENERATE A MONSTER!

MANAGE YOUR SUMP SLUDGE!

FOLLOW NAM ENVIRONMENTAL STANDARD #8 WASH BAY SUMP SLUDGE MANAGEMENT

Operations in the wash bays must be managed as to prevent undue contamination of sump sludges.

This can be accomplished by means such as:

- PROHIBITING the use of hazardous chemicals such as paint, paint products and degreasing solvents.
- PROHIBITING the cleaning of chemical transport tanks (interiors) and other chemical containers in wash bays.
- PREVENTING disposal of used oils into the sump system.
- MAINTAINING the oil/water separator system.
- CLEANING the sumps frequently to prevent the concentration of contaminants, etc.

WASH BAY SUMP SLUDGES MUST BE ANALYZED FOR TOXICITY
AND DISPOSED OFF-SITE AT AN APPROVED DISPOSAL COMPANY
AND NEVER PLACED IN THE YARD!
